Optimist-MMX™

(Say "twenty ten")
 ...with Built-in 60GB Hard Drive

New for 2010!

The *Optimist-MMX* is the latest augmentative/alternative communication (AAC) aid from ZYGO. As in the past, **ZYGO has enhanced a versatile PC to provide the loud, clear output and switch access input required for an AAC device.**

The physical attributes are obvious from the pictures—it's usable like a laptop from the keyboard and/or as a touch-screen tablet. It's durable, is drop and spill resistant and has a built-in carry handle (removeable, if you prefer) and will withstand the demands of everyday use.

The *Optimist-MMX* is available preloaded with a choice of AAC packages and a variety of speech synthesizers. Or, the unit is available without software so you can add your favorites.

Dialects, dedicated Speech Generating Device (SGD) versions are available for Medical Assistance requirements.

Medicare Assignment Accepted
 Medicare Code E2510

Specifications

Full-screen dynamic display
 MS-Windows® XP
